

AMENDMENT UNDER 37 C.F.R. § 1.111  
Application No. 10/009,896

**AMENDMENTS TO THE SPECIFICATION**

Please replace paragraph beginning at page 15, line 10 with the following rewritten paragraph:

In Fig. 4, a spinning opening 11 formed in a spinneret 15 has a form in which a flat projection-formed opening part 13 and a triangle-formed opening part 12 are connected to each other at a connection portion 14, a side ~~15~~ 15a of the triangle-formed opening part facing the connection portion 14 is curved in an inwardly curved form. When extruded through the spinning opening as mentioned above, the resultant curved faces of the filamentary polyester melt streams are made to a substantially flattened faces immediate after the extrusion by a surface tension of the melt streams.
